

INFORMATION SECURITY POLICY

At **Servihabitat**, information is a fundamental asset for assuring the provision of its services and products, which is the reason why there is a commitment to guarantee a level of security for the proper protection of information.

The **Servihabitat** management, therefore, has laid down and implemented an Information Security Management System (ISMS) based on International Standard ISO/IEC 27001:2013 in order to detect, assess and minimize the risks.

The prime aim of this Security Policy is to assure:

- **Confidentiality:** The confidentiality of the information referring to its clients is the main pillar on which the relationship of trust that constitutes the very essence of **Servihabitat** activity rests. Accordingly, the information systems will only be accessible to those persons expressly authorized, by the means provided.
- **Integrity:** The integrity of the information is assured throughout the handling and storage process, so that its accuracy is guaranteed.
- **Availability:** The availability of the information systems is guaranteed in any situation through provision of the necessary plans and measures required to assure the continuity of the services and their restoration in the event of any possible contingencies.

The set of Security policies, standards and procedures are kept updated in line with the context of the organization and in keeping with its strategy for meeting both internal and external threats.

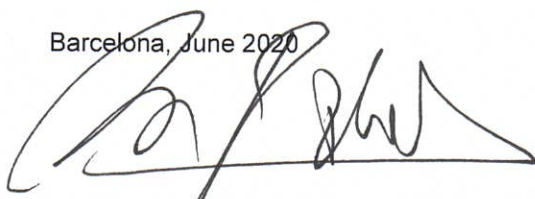

The **Servihabitat** Management undertakes to comply with the information security aims laid down, supplying the resources needed in order to implement the checks and minimize the risks.

All the parties involved undertake both to comply and assure compliance with all the security principles that the Management has established so as to guarantee the protection of the information and continuity of the business at all times.

This policy will be notified to all those concerned within the scope of the ISMS and will remain at the disposal of all interested parties for purposes of any enquiry.

The **Servihabitat**, Information Security Policy has an Integrated Quality, Information Security and Environment Management System where the commitments of the organization are described.
